## PRODUCT LINE SHEET

### BUBBLE ROLLS ◦ ANTI-STAT

The standard bubble cushioning can create static when being used which can cause damage to motherboards and computer chips. That is why it is vitally important to choose anti-static bubble wrap when shipping electronic products

- Protect static sensitive products like delicate electronic components
- Protect your electronic goods against static discharge during shipment with our best quality anti-static bubble
- Smooth on the inside, and bubble on the outside.

### SMALL - MEDIUM- LARGE BUBBLE

- Heavy-duty strong Bubble
- Protects corners from scratches
- Perforated every 12".
- Slit per request

Bubble Cushioning is an air cushioned material that is lightweight, clean and flexible. It is a cost-effective and reliable protective packaging option that minimizes damage when packing, shipping or storing goods.

#### Primary Applications

- Include cushioning and wrapping
- See-through material so product identification is instant and easy
- Flexible to conform around odd shapes for quick, easy wrapping
- Puncture resistance
- Available in varying cell heights
- (1/8" very small, 3/16" small, 5/16" medium and 1/2" large bubble)
- Available in various roll widths and lengths
- Multiple performance grades ranging from heavy duty to light duty
- Options include anti-static, adhesive, cohesive and recycled content

# MAILERS/ POUCHES

## PRODUCT LINE SHEET

[www.internationalcushioning.com](http://www.internationalcushioning.com)

### KRAFT-MAILERS

ICC Kraft Bubble Mailers offer a lightweight yet durable solution to keeping a variety of small items safe in the mail while being cost-effective and practical. With these bubble mailers, you can have more padding protection for valuables you don't want to bend or break in transit since they come with bubble cushioning for additional padding. In addition, books, crafts, and other compact items can fit easily in these mailers, which are available in a wide range of sizes. Moreover, there's no need to use tape, making it a dependable, durable, and affordable way to mail your possessions.

### BUBBLE - MAILER

Durable white flat poly mailers are ideal

- weather-proof protection for shipping books, crafts, jewelry, and other semi-fragile items. A large variety of sizes.

### FOAM POUCHES

Unbeatable protection in a convenient, lightweight bag

- Non-abrasive, polyethylene air foam cut and sealed to form a convenient lightweight bag
- Made from 1/8" polyethylene foam
- Provides great surface protection and cushioning
- Ideal for packing dishes, frames, plaques and more
  - inquire for more details on sizes

### BUBBLE POUCHES

When moving and in storage, your fragile objects need a little extra protection. To ensure your most delicate items receive the protection they deserve, slip them into ICC bubble pouches for extra safety and cushioning. Tough enough to protect your valuables, these bubble pouches safeguard items from breaks. Use them to protect dishes, picture frames, ornaments, and collectables during moving and storage.

# LAMINATED BUBBLE PRODUCTS

[www.internationalcushioning.com](http://www.internationalcushioning.com)

## PRODUCT LINE SHEET

### LAMINATED BUBBLE

Laminated bubble wrap is designed to offer better levels of surface and cushioning protection to your products. Some key features and benefits are scratch and puncture resistant, high tear strength, with a cost effective protection.

An additional product of your choice is laminated onto the bubble wrap to give you one convenient piece of material.

### SPECIALTY APPLICATIONS

ICC offers a wide array of Bubble Laminations to meet your specific needs.

#### Applications and Uses

- Cohesive Bubble
  - Adhesive
  - Films
  - Paper
  - Multi Layer
  - Foam
- Furniture
  - Automotive
  - High finished products
  - Signage
  - Interleaving and surface protection

Laminated bubble wrap is becoming a more popular packaging solution, increasing productivity with the efficiency of wrapping components just once instead of twice to get the protection and cushioning required.

Available in both regular and anti-static material, also perforations or cut to size laminate to your desired foam thickness.
