CORNERBOARD EDGE PROTECTION

Cornerboard often goes by many different names, including angleboard, edgeboard, or edge protectors, but no matter what, it's always the same basic product. It offers premium protection to the edge of products on pallets from strapping, stretch film, and other damages that may happen during storage or shipping.

USES

- Corner boards are in fact excellent to stabilize and distribute pallet loads evenly, which reduces the risk of accidental damages during both transit and handling activities.
- Protect your pallets from damage throughout the shipping process with corner boards. Our high strength, water resistant cornerboard protectors prevent damage to pallets, while also allowing for even distribution of weight for safe stacking.
- This shape is then placed on the edge, corner, top or bottom of a pallet to hold it together during the palletizing, stretch film application, and storage process.

FEATURES AND BENEFITS

Corner Board protectors and are used to help stabilize loads and add extra protection during shipping and storage.

- Exceptional Strength
- Made with recycled paper
- Heavy Duty
- Moisture Resistant
