ICC ENGINEERED FOAMS

Pro-Tec Plank Foam

Key Features of Our Plank FOAM Products

- Our plank FOAM products are meticulously designed to meet precise specifications.
- They offer versatility and are user-friendly.
- Engineered for optimal shock absorption and vibration dampening, they deliver exceptional cushioning and support.
- The clean, non-abrasive material ensures excellent surface protection.
- With consistent products that demonstrate outstanding dimensional stability, ICC's Plank Foam can be easily shaped into various forms, shapes, and die-cuts.
- They are recyclable within the LDPE #4 waste stream (where accepted).
- Offered in a variety of widths, densities, and thicknesses to accommodate different applications.

Applications

Automotive

- Trim
- Windshield Packs
- Bumper Packs
- Dunnage
- Parts Separators

Recreational

- Archery Targets
- Surf Boards
- Canoes
- Pool Lounge
Chairs

Electronics

- ATM'S
- Display Monitors
- Transformers
- Digital Drives
- Photography
Equipment

Miscellaneous

- Stage Props
- Furniture
- Building
Closure Straps
- Oil Boom
Containment

Discover ICC's Plank Foam Products

Our plank products offer a wide array of protective solutions specifically designed to meet your packaging needs across different applications and markets. We look forward to collaborating with you through our customized offerings. Our sales team partners with fabricators and converters, to deliver the ideal material and laminated foam solution for every protective packaging requirement.

LET'S GROW WITH US

Pro-Tec Plus Laminated Foam Plank

Engineered Foams

- Our plank foams offer superior cushioning and outstanding dimensional stability, all while being an economical plank product.
- Pro-Tec Extruded in ½" thicknesses, Pro-Tec is laminated to produce planks of varying total thicknesses.
- Pro-Tec Plus is a dual-density layered plank features a thin-gauge, high-density PE top skin combined with a high-performance, low-density laminated foam base, providing a tailored solution.

Pro-Tec Engineered Foam Laminated Plank Typical Properties

| PROPERTY | UNITS | PL120 | PL170 | PL220 |
|----------------------|------------------------|-------|-------|-------|
| Compressive Strength | lb/in ² 25% | 3.5-6 | 4-7 | 6-10 |
| Compressive Strength | lb/in ² 50% | 10-14 | 12-16 | 14-18 |
| Compressive Set | % 24hrs | 18-20 | 18-20 | 18-20 |
| Nominal Density | lb/ft ³ | >1.1 | > 1.5 | > 2.0 |

¹Denotes properties specified in CID-AA59136, (Federal Specification PPP-C-1752D). Per ASTM D-3575 Suffix D.

ICC prioritizes sustainability by minimizing energy use, natural resource consumption, and waste while maintaining product quality. The team conducts waste audits and analyzes processes to reduce waste. They use higher-yield materials to make products lighter, decreasing energy use and greenhouse gas emissions.
